

AIAA 3201 Project Release

Project Brief

- Four advanced topics for you to choose, please check Canvas documents for details
 - Video Super-Resolution
 - Visual Navigation in 3D Environments
 - Video Object Removal & Inpainting
 - Generative Sparse-View 3D Reconstruction

Project Requirement

- Team formation
 - **2 persons a team**, we will collect your information by this week. Let TAs know if you have problems to find a teammate
- Computational resources
 - You may apply the online computing credits from TAs, when you try to run deep learning models
 - Note the credit is limited for each student, please do not waste
- Project timeline
 - **Week 11 & 12**, present your project progress in class.
 - **15th May 11.59PM**, project submission in Canvas deadline

Project Oral Presentation

- **At least Part 1** of the project should be completed
- You need to give introduction on your **basic methods, experiments and the plan for your next step**
- Each team submit an **8-min video recording** of your presentation
- **No need to worry!** The presentation contributes **very little (5%)** to your final grades, as long as you show your progress efforts, you earn it.
- We will try to give your feedback to improve your project

Project Final Submission

- We follow **standard** research publication release process
 - **(Mandatory)** Release your code to the public by [GitHub](#)
 - **(Optional)** A demo video or a project page
- Zip **all the above files, the arxiv link and the Github link**, submit them in Canvas, by **15th May 11.59PM**

Project Report

- **Abstract & Introduction:** Background, motivation and solution overview. Explicitly include your GitHub repository link at the end of abstract.
- **Related Work :** You should review **at least all papers** listed in the Reference Section. Expanding beyond this list is encouraged.
- **Method:** Explain the technical roadmaps in your own words.
- **Experiments:** Present quantitative results (Tables) and qualitative analysis (Figures).
- **Conclusion:** Summary, limitations, and future work.
